

Adjustable Hamster - Daystate Mark 4 Rifle

Hamster Fitting.

Thank you for your purchase. Please read these fitting instructions before attempting to fit the trigger.

1. Layout your rifle, preferably on a flat stable surface, and refer to the manufacturer's safety notes for when working on your rifle.

Your kit should contain –
1 off Hamster plate with collar fitted
1 off post
1 off M12 x 50mm button head screw
1 off 3mm allen key

2. Ensure the electrical isolation switch is set to safe with the key.
Remove the stock retaining bolt from the bottom of the stock with an 8mm allen .

Safety first.
Observe safe practices when handling your rifle and follow the manufacturer's safety instructions when doing so.

3. Take the M12x50mm screw and feed it through the post.
Re-fit the screw and tighten to secure the post to the stock
Ensure the flat area on the post is to the left side of the stock.

Take extra care when working on your rifle.
Ensure that the rifle is switched OFF, the safety catch is set to safe and is absolutely not loaded with pellets.

4. Fit the hamster over the post and align so the M6 grub screw is on the flat section of the post.
5. Set the height to preference and tighten the side locking grub screw.
